

Fossett Paving

Collierville, Tennessee

FISHER ARNOLD

PROJECT EXPERIENCE

Fisher Arnold provided the landscape design for Fossett Paving's recently completed, new 15,000 ft. facility in Collierville, TN. A significant number of native plant materials were selected to supplement existing mature trees, and the overall design provides strong connection between the interior and outdoor spaces, with focal plantings framing floor-to-ceiling window vistas and detailed plantings at outdoor seating areas. Colors were specifically chosen to add to the calm, cool and modern aesthetic provided by the LRK-designed building.
