

IMC Corporate Headquarters

Collierville, Tennessee

FISHER ARNOLD

PROJECT EXPERIENCE

IMC is one of the world's largest international operations and Memphis' largest intermodal company. They moved their corporate headquarters from two leased buildings to their own building to be located within the Schilling Farms Water Tower District. Schilling Farms is a campus-style environment that provides amenities including restaurants, athletic clubs, walking trails and other features.

IMC's 6.91-acre office lot is located within the southeastern portion of the Water Tower District. The new headquarters is a \$17.5 million, 3-story, 75,000 SF office building that was designed by Fleming Architects. Fisher Arnold provided site entitlement, engineering, and landscaping services for the project.
