

SR-4 (Lamar Avenue/ U.S. 78) Improvements Shelby County, Tennessee

FISHER ARNOLD

PROJECT EXPERIENCE

Fisher Arnold was selected to provide surveying and roadway design services for a section of SR-4 (Lamar Avenue/U.S. 78) from the Mississippi/Tennessee State Line to just south of Shelby Drive. This 1.4 mile section of highway includes improvements from a 4-lane divided highway to a 6-lane divided highway. The project includes the design of a tight-diamond interchange with retaining walls at Holmes Road. The design further includes improvements to the intersections of Tuggle, Old Highway 78, and Holmes Road. A major consideration for the design of the project was traffic control; we were able to maintain two lanes of traffic in both directions while phasing the construction.
