

UT Medical Group, Inc.

Germantown, Tennessee

FISHER ARNOLD

PROJECT EXPERIENCE

Fisher Arnold provided site civil design, construction documents, preparation of landscape and greenbelt plans, coordination with architects, and assistance with obtaining governmental approvals for this new 110,000 SF office building housed on 10 acres located in Germantown, Tennessee south of Wolf River Blvd. and east of Germantown Parkway. Utilized by UT Medical Group for the West Cancer Center - East Campus, the facility was prepared in conjunction with brg3s Architects, and a portion of the site was designated as Germantown Greenbelt that connects to the parkland and greenbelt system along Wolf River. The facility's design concept used the materiality of space to signify way finding including areas of circulation versus areas of waiting and also clearly delineating clinic entries and areas of interest. Wood slats accentuate important information areas vertical circulation. Art is also a crucial element of the experience.
