

# New Academic Building Southwest TN Community College Memphis, Tennessee

FISHER ARNOLD

## PROJECT EXPERIENCE

Fisher Arnold provided the architectural design for Southwest Tennessee Community College's new, 21st century, two-story, 106,000 SF academic building with 28 classrooms, six science labs, and 16 computer labs. The campus services as home for a majority of technology programs including Automotive, Computer, Engineering and other technical disciplines. It is also home of the Southwest Culinary Institute and Corporate and Continuing Education programs. In addition to the new classroom technology, the new building also has a presentation theater, a service-learning and honor-programs suite, three conference room and supporting Deans and faculty offices.
