

Lucite International*

MMA Roof Replacement

Memphis, Tennessee

FISHER ARNOLD

PROJECT EXPERIENCE

Fisher Arnold was chosen by Lucite International to replace the roof at their Memphis facility. The project included site verification of the existing conditions, determining the best solution to issues, a complete re-design of the roofing system and administering the construction of the project (site visits and shop drawings). The design for this particular project included a complete tear off of the existing roof and then the application of a new Modified Bitumen Roofing system. Other design features include new scuppers, downspouts, metal copings, 2 entry canopies, 2 wall ladders, and a new innovative keyguard handrail system around the entire perimeter of the building. * Now Mitsubishi Chemical America
