

# Rossville Greenbelt Pedestrian & Bikeway Trail

## Rossville, Tennessee

FISHER ARNOLD

### PROJECT EXPERIENCE

Fisher Arnold worked with the Town of Rossville to develop a comprehensive Greenbelt Plan. The overall system incorporates a broad spectrum of planning issues, from long-range transportation to conservation planning. The team successfully worked with stakeholders to identify distinctive segments of an overall greenbelt system and to develop standards for their implementation. Portions of the greenbelt extend through the heart of the town's charming historic district, while others incorporate the William B. Clark conservation area or wind along Morrison Creek, a local major natural water feature. The team also assisted the Town in its application and provided design for an RTP bridge and walking trail that was administered by TDEC.
