

# Fite Road Roadway

## Shelby County, Tennessee

FISHER ARNOLD

### PROJECT EXPERIENCE

The Fisher Arnold transportation design team completed both preliminary and final design for this 1.5-mile stretch of new urban roadway for the Shelby County Government. The \$12.5m project included a 5-lane urban curb and gutter section with a continuous left-turn lane and raised median. The design required preparation of vertical/horizontal alignment, drainage, erosion, details, quantities, cross-sections and right-of-way plans and descriptions.
