

Olive Branch City Park

Olive Branch, Mississippi

FISHER ARNOLD

PROJECT EXPERIENCE

Fisher Arnold prepared the master plan and construction documents, provided boundary/topographic surveys and construction administration for this 45-acre addition to the existing Olive Branch City Park. The park addition features 11 softball and T-ball fields, concession/restroom building, walking trails, nature area, group and individual picnic shelters, and an amphitheater overlooking a lake. Much attention was given to the design detail by coordinating street signage, entrance signage, color patterns, and architectural themes throughout the park. The completed 135-acre campus now features the aforementioned amenities plus three lakes, fishing pier, playground, an eight-lane track, two miles of trails with exercise stations, a half-mile nature trail, two picnic pavilions, scenic overlook, mountain bike trail and two dog parks.. This project has won two state awards in parks and recreational categories.
